

Infinity

TRI-STAB "TvDm" Vertical Drilling Motor

Keep it straight... with 'TvDm'

Infinity Downhole Tools is a young, aggressive oil and gas supply business operating in Nisku, Alberta. We offer all customers 130+ years of combined experience in the downhole tool business. Our trained service technicians are available 24 hours a day, 7 days a week to provide you with the best and most reliable motors, jars and shocks on the market today. Our technicians service all tools from top to bottom, so that the quality of Infinity's products are never compromised. We proudly claim that we have over 10,000 hours in total on our motors with no failures to date. All of our tools are serviced, repaired and inspected on site at our 7,200 sq. ft. service centre.

When you want it drilled ASAP... (as straight as possible)

The new Infinity TRI-STAB Vertical Drilling Motor 'TvDm' is the leader in keeping vertical holes as straight as possible, and provides an efficient, cost-effective means of maintaining a vertical trajectory using cutting edge technology.

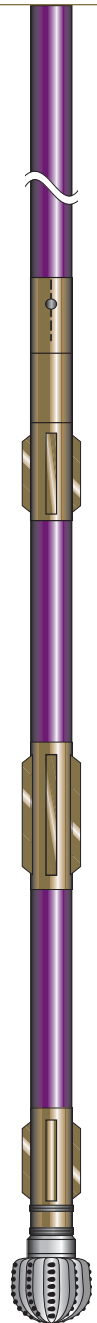

The Tri-Stab 'TvDm' is designed with three stabilizers optimally placed in the BHA to reduce wellbore spiralling and bending of the BHA. When designing our 'TvDm' for vertical drilling, we immediately realized that the position of the primary control stabilizer was most critical. The length of blade and width of blade also has a significant effect on performance. All of these facts were analyzed in a proprietary model to ensure optimum placement and stiffness of the 'TvDm' to ensure it will meet the requirements of a Vertical Drilling System.

The benefits of running a 'TvDm' in your wellbore:

- The reduction of fanning hole to stay vertical, thus increasing ROP.
- Significant cost-savings compared to high end Rotary Steerable Systems.
- Full gauge hole, less casing-running issues.

Hole Size Available	
Inches	mm
6"	152.4
6-1/8"	155.5
6-1/4"	158.8
7-7/8"	200
8-1/2"	215.9
8-3/4"	222.3
9-7/8"	250.7

To find the right Infinity Motor for your next drilling project, please see our additional Motor Specifications.
